DETAILED ACTION

Claim Objections

Claim 8 is objected to because of the following informalities: the continuous band recited in claim 8 lacks antecedent basis. The continuous band is in claim 6, not in claim 5. Appropriate correction is required.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

Claims 1-6, 9, 10 and 12 are rejected under 35 U.S.C. 102(b) as being anticipated by Lewin 5,088,593 A (of record). Lewin discloses a secondary with magnetic driving elements 4, a cover 2 and support units 33, 34 for supporting the cover for movement relative to the secondary.

In regard to claims 2 and 6, see Lewin column 1 lines 55-67.

In regard to claims 3-5 and 12, see elements 33 and 34 in Lewin figure 1A.

In regard to claim 10, see elements 33 and 34 in Lewin figure 1a and see Lewin column 1 lines 55-67.

Allowable Subject Matter

Claims 7, 8, 11 and 13-20 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

The following is a statement of reasons for the indication of allowable subject matter: The prior art of record does not disclose or teach a drive member operatively connected to a least one deflection member in combination with the other features of claim 7. The prior art of record

Art Unit: 2834

does not disclose or teach a wiper element sweeping across the surface of a continuous band in combination with the other features of claim 8. The prior art of record does not disclose or teach deflection members disposed to the side of a carrier in combination with the other features of claim 11. The prior art of record does not disclose or teach a band secured to the rotor in combination with the other features of claims 13 and 15.
